

Flora Lichtman has covered science and the environment — radio, video and writing — for outlets including NPR, *The New York Times*, *Popular Science* and *The Atlantic*. She is currently co-director of the *New York Times* Op-Docs series “[Animated Life](#)” producing short animated science films. She also worked as managing editor of video and substitute host for [Science Friday](#), and is co-author of *Annoying: The Science of What Bugs Us*. Lichtman previously worked at a NATO lab, studying marine mammals in the Mediterranean.
